September 2011

Downtime is catastrophic to your operation. Stoppages caused by either emergency repairs or planned outages impact your productivity - and your bottom line. At Great Lakes Mechanical Services, our team of skilled craftsmen stand ready to provide immediate on-site response, 24/7, to get your equipment back up and running as quickly as possible.

Since 1976, Great Lakes Mechanical Services has been a solutions-driven provider to industry, large and small. When you are overwhelmed by emergency repairs, need day-to-day equipment maintenance or require support for planned shutdowns or outages, we are your partner in providing cost-effective, efficient solutions that save time and money, because we get it right the first time.

When you need a part now and it's weeks to deliver, or the part is no longer manufactured, we'll fabricate it, and probably improve on it. We regularly meet extreme deadlines.

Our customers come to us again and again - and refer us again and again - because we remain dedicated and true to our mission: ***We will surpass all industry requirements in safety compliance, while continually exceeding the needs of our customers through a combined commitment to keeping exceptional quality standards, cost sensitivity, and providing efficient solutions that maximize production uptime.***

Our most recent challenge? Working to ensure all machinery was ready for a First Heat at a regional steel company - what an exciting moment!

**Gary Lombardi,
President**

Gary has never encountered anything that he can't build or repair. Starting years ago alongside his father, Gary has been solving the mechanical problems of industrial and plant equipment for decades. He is dedicated to rebuilding blue collar jobs and respect for those jobs, as he understands the love of problem-solving with your mind and hands, accomplishing something real. Gary has installed, fabricated, moved and repaired equipment throughout our country, all under or within deadline.

When Gary's brain isn't snapping with solutions, he relaxes by riding his Harley to a quiet fishing spot with Chris, his wife of twenty years, and reading a good history book. Chris and Gary's two girls are now grown and their two dogs are currently the love of their lives.

**Chris Lombardi,
Executive Vice President**

Gary's partner in every sense of the word, Chris handles marketing strategies and financials for the company. With a background in budget and cost control, vendor management, negotiations and customer service, Chris brings to the table professional and friendly relationship building skills.

Chris unwinds with Gary at those fishing holes, but often leaves him at shore to go antiqueing and prepare to entertain friends. Also an avid reader, Chris agrees with Gary; with the girls gone, those dogs rule the house.

Industries We Serve

- Steel
- Petro-Chemical
- Utility
- Railroad
- Manufacturing
- Forging
- Food Processing
- Construction Sites
- Distribution Centers
- Fleet Maintenance

Equipment We Service

- Machine Tool Installation & Repair
- Machine Tool Foundations
- Air Compressors & Dryers
- High Speed Packaging Equipment
- Slitting & Cut to Length Lines
- Mechanical & Hydraulic Presses
- Machinery Guards & Interlocks
- Electrical & Motor Controls
- Paint Booths
- Curing Ovens
- Dust Collectors and Bag Houses
- Process Piping and Valves
- Heat Exchangers
- Conveyor Systems
- Welding & Fabrication
- Fleet Maintenance Programs
- Heavy Equipment
such as end loaders

Ask us about establishing Preventative Maintenance programs!

A Sampling of Our Projects

A local steel company called on us to rebuild a 40-year-old gearbox. As a significant number of parts could not be found, we manufactured those parts, giving that gearbox a whole new life.

We have been working on the railroad, repairing cranes for one of the top three railroads in our country.

Our job can be very hazardous and dangerous, especially when the area we have to work in is extremely tight and filled with other equipment. In these circumstances, we built a lifting system for an 8,000 lb. plastic extruder.

We've repaired forge furnaces, transfer cars and ancillary equipment for another steel company.

- We've also:
- Assembled a 90 ton electric arc furnace, First Heat June 2, 2011
 - Assembly and testing of 8,000 ton Forging press
 - Emergency repair to foundation of tension leveling / temper mill cut to length line
 - Installation of 4 oxy/fuel plasma tables totaling 800' x 24'
 - CNC machining centers
 - Assembly and repair of 24' x 6' Ingersoll planer mill
 - Assembly and repair of 80 ton remote hydraulic manipulator
 - Installation of ladle Metallurgical furnace
 - Installation of cooling water piping and treatment plant
 - Installation of compressors and house piping systems

Do you have a challenge, either routine or unusual?

We have the solutions.

Call Gary Lombardi or Bill Brigham today and discover how we can help with innovative thinking and cutting-edge engineering.

Nancy Williams, Administrative Assistant

The gatekeeper of so many projects and a vital cog in our own machinery, Nancy completes tasks within accounting, payroll and finance, purchasing, human resources, customer service, marketing, sales and more. Our customers find Nancy to be a detail-oriented professional with exceptional communication skills, an integral part of our team. Nancy has two sons and three grandchildren. If we can't find her at a local fair or fest, we'll find her nose in a book.

Bill Brigham, Account Executive

Discovering our customers' problems and finding ways to solve those problems has been Bill's strength for over 18 years. A 20-year member of ASME (American Society of Mechanical Engineers), Bill has a keen understanding of what it takes to build, maintain and repair equipment. Bill gets the job done with intelligent communication and respect for your budget. Bill is married and is fortunate to have two sons and three grandchildren. His love of history, astronomy and detail painting help him relax.

Frank Wilson, Mechanic

Frank has spent twenty-five years as a Ford Master Mechanic and twenty years fabricating parts. His four years as a semi-truck mechanic and two years building and repairing tow trucks, in conjunction with gear box rebuilding talents and welding and pipe-fitting skills, make him an invaluable part of our organization. Fortunately for him, Frank loves his wife Kathleen just a little more than he loves his Harley.

If you could change one thing about your current provider, what would it be?
