*Devoted to the
diagnosis, research
and treatment
of women's health
challenges.*

Our physicians have been providing research-based, superior urogynecological and minimally-invasive gynecologic care for decades. We are dedicated to the unique issues women face, such as urinary incontinence, prolapse, pelvic floor dysfunction hormone imbalances, and sexual dysfunction.

Our commitment to excellence drives every aspect of treatment. Women's Health Institute has assembled a team of physicians, nurses and nurse practitioners, physician assistants, physical therapists, an acupuncturist, and psychologists to provide you with the therapy best suited to your situation.

Thorough counseling about non-surgical, surgical, medicinal or non-medicinal options, Women's Health Institute of Illinois provides multidisciplinary, compassionate, unmatched patient care, tailored to your needs, preferences and choices.

Testing Services

- **clinical evaluations**
- **urodynamic testing**
- **cystoscopy**
- **hysteroscopy**
- **pelvic muscle assessment**
- **ultrasound**

Therapies (office based)

- **medications**

- **hysteroscopic tubal occlusion**
permanent birth control/Essure®
- **Botox® injection into bladder**
for urge incontinence
- **minimally invasive neuromodulation**
for urge incontinence
- **pelvic floor physical therapy**

Surgery

Minimally invasive surgery whenever possible to treat:

- **Urinary incontinence**
- **Pelvic Organ Prolapse**
- **Uterine fibroids**

Our approach to gynecologic surgery:

In 2010, our advanced gynecologic surgeons performed minimally invasive procedures in 99% of the women who required surgical management of their gynecologic or urogynecologic condition. The vast majority of our women have surgery as outpatients or require less than a 23 hour stay in the hospital.

- **vaginal surgery**
- **laparoscopic surgery**
- **robotic (DaVinci®) surgery**

Minimally invasive surgery means less pain, less risk of infection and faster recovery, getting you back to good health and to your family, work, and your regular activities quickly.

Research

As leading researchers in the fields of gynecology and urogynecology, our clinicians have access to cutting edge therapies, often nonsurgical, and to devices not available to patients elsewhere that allow for the treatment of bladder and uterine disorders. Clinical trials or research based therapies are usually available without concerns of insurance coverage.

Call to schedule a consultation at any of our offices, conveniently located throughout the southwest suburbs in Oak Lawn, Downers Grove or Orland Park.
